

BUFFALO

SAFETY RAZOR

Comfort, ease, safety and convenience in shaving are all secured by using the Buffalo Safety Razor.

It is scientifically made to meet all requirements for a perfect shave.

The angle of the blade gives the proper slanting stroke that makes shaving smooth and easy while the handle is held in the most natural and comfortable position.

Simplicity in construction adds to the ease and convenience in handling; saves time and annoyance.

The blades of highest quality steel have exceptionally keen edges. One blade is good for six, eight or more shaves without stropping or honing.

To Remove Blade

Simply push the blade at either end so that it projects from frame, then grasp with thumb

and finger and pull it out.

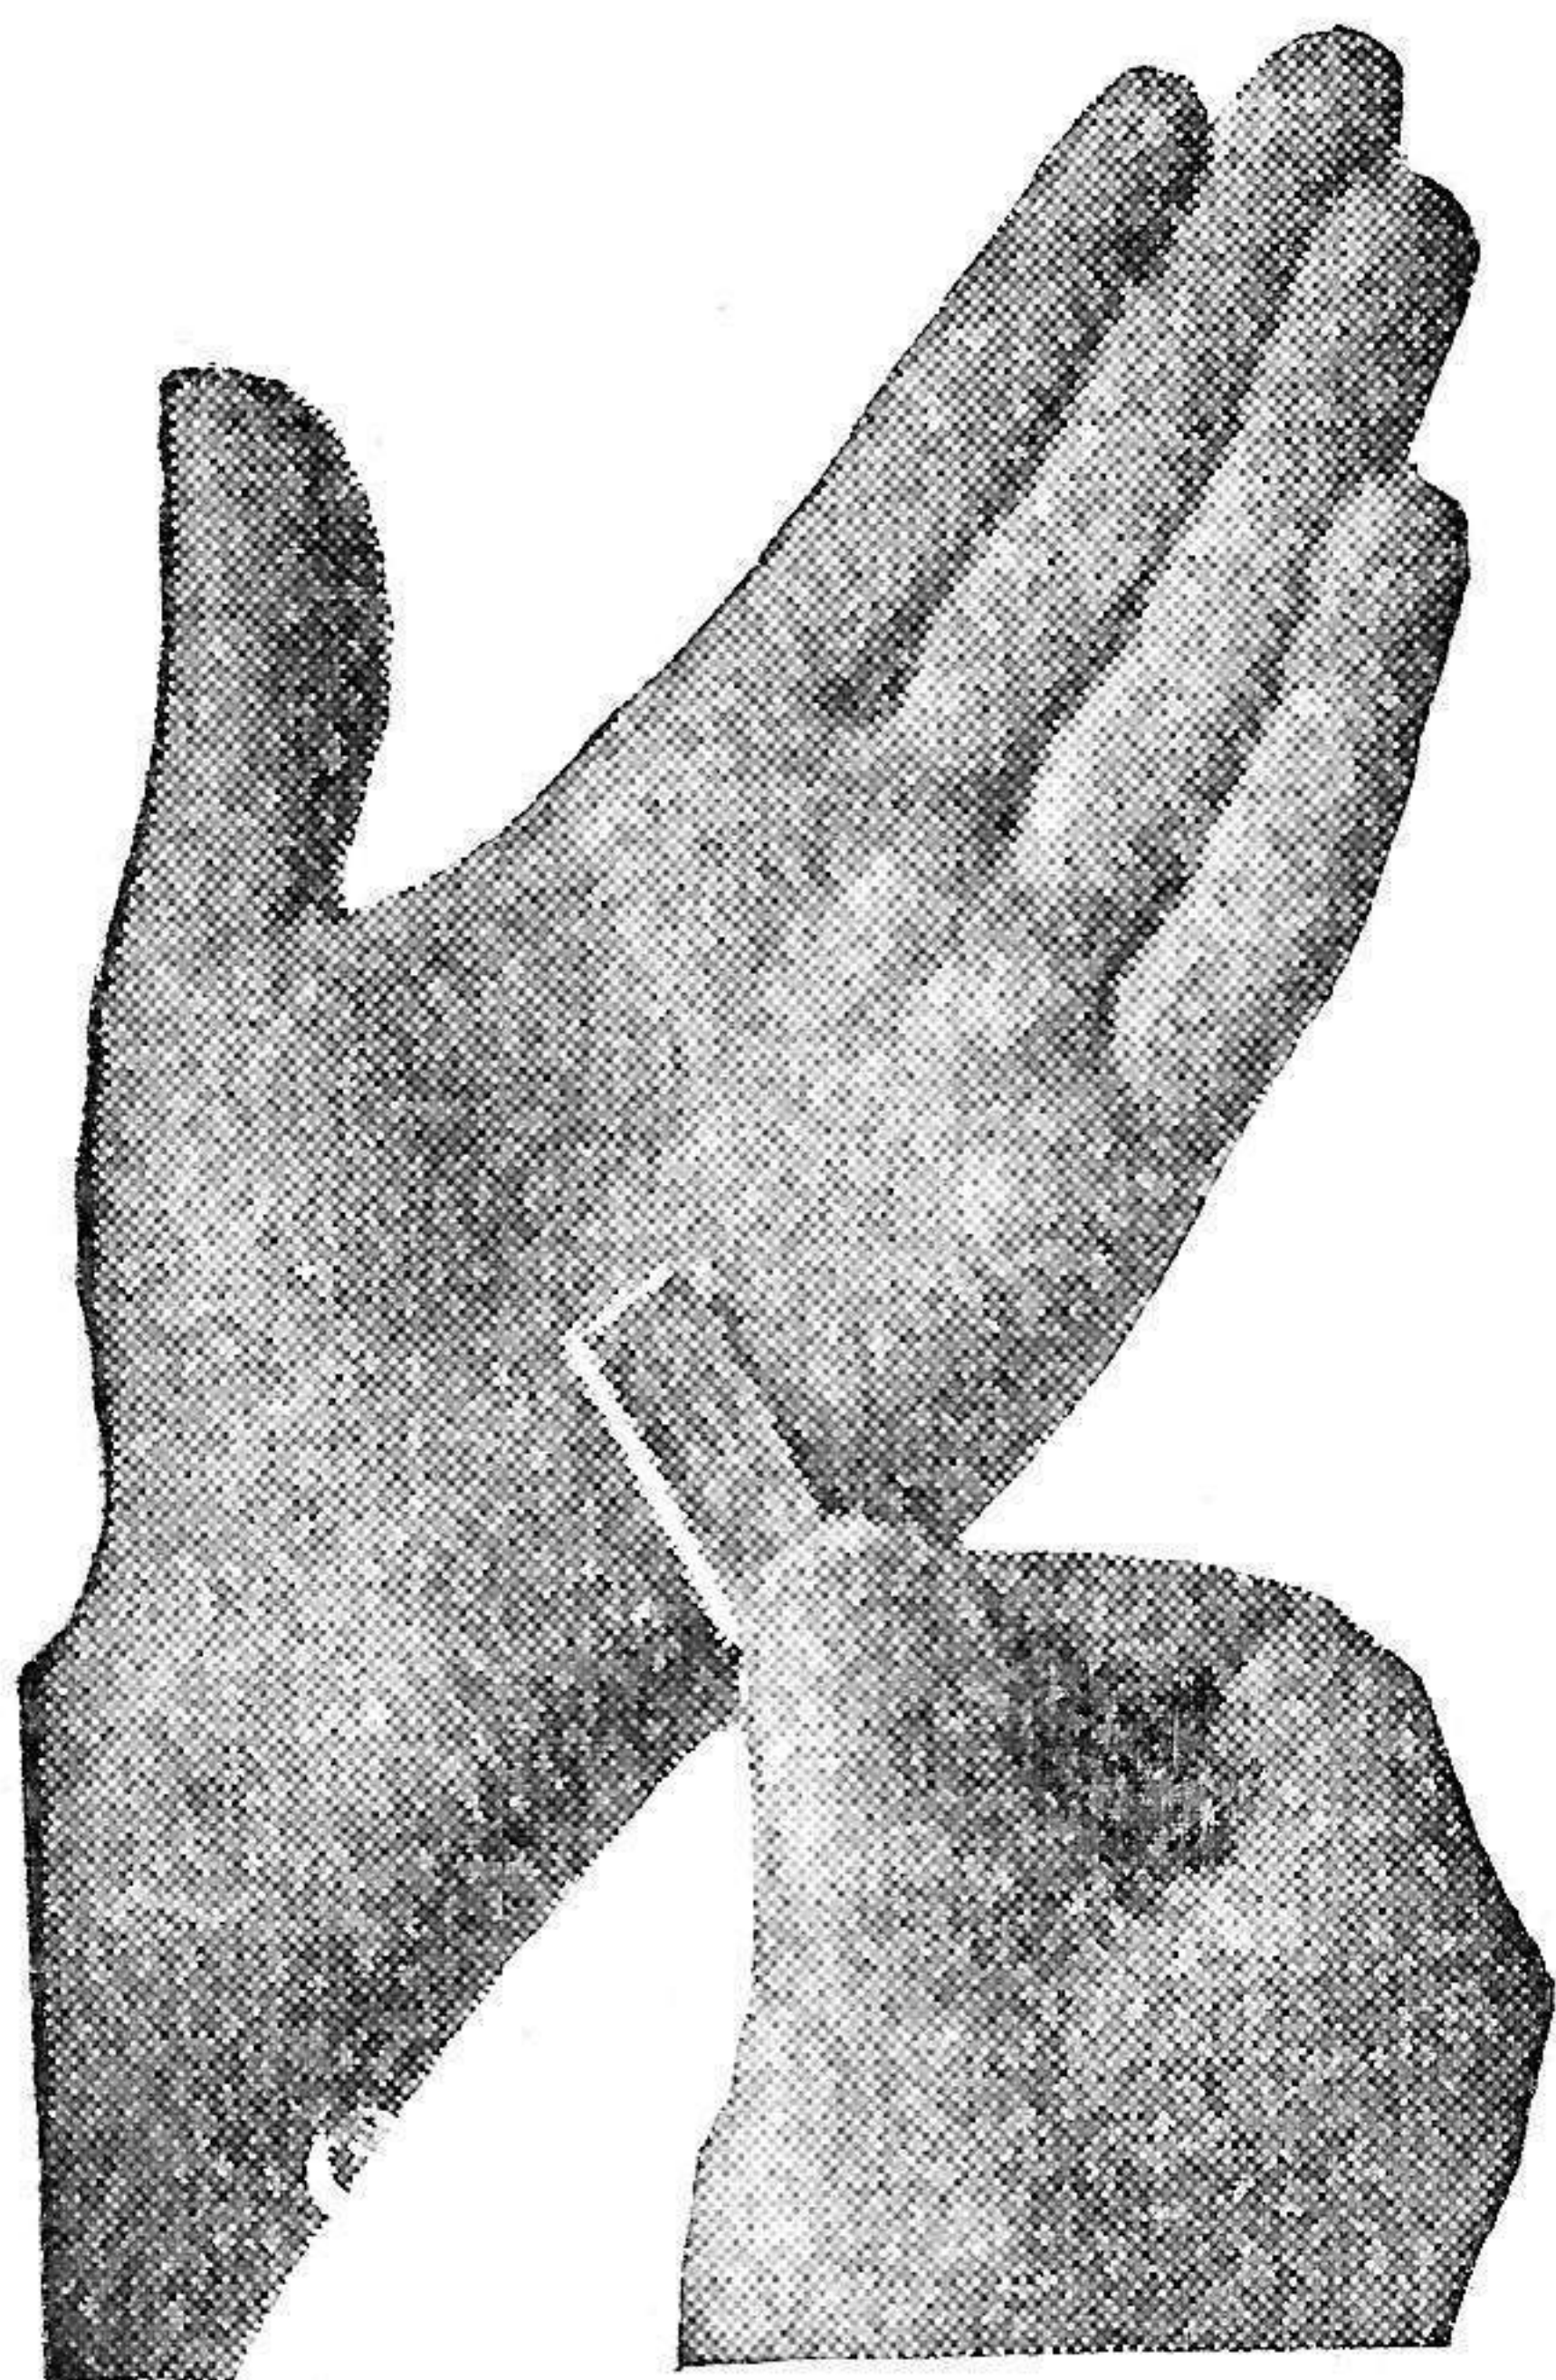

To replace, slide blade back into position, then by means of the projections at the top of blade, pull it back so that it sets firmly and evenly against the frame.

This simplicity of construction not only adds to the handiness of the Buffalo Safety Razor but makes it possible for us to give you the greatest value at the lowest cost.

How to Use the Buffalo Safety Razor

Before shaving, draw the blade over the palm of your hand a couple of times, as you would on a razor strop (see illustration), to clean from the edge any dirt or dust that may have accumulated there; then replace blade in the frame.

Proper lathering is as important to the shave as a good razor. You can not get the best results unless you lather well.

First have good shaving soap, soap that will not dry quickly.

Larkin Shaving Soap, Cream and Powder fully meet these requirements. They are of guaranteed purity, finely perfumed, and

add greatly to the comfort and pleasure of the shave.

Lather the face freely, rubbing the lather thoroughly into the beard with the brush or fingers. Use warm or hot water if possible. Dipping the razor in the water adds still more to the ease of shaving.

Take the handle of the razor lightly between your thumb and fingers. Don't grasp it like a club. Shave with an easy, sliding stroke and you will

find shaving with the Buffalo Safety Razor a real comfort.

This outfit includes one Buffalo Safety Razor complete with blade; also five extra blades.

When you consider that with this you also get a Merchandise - Bonus that would cost you 75 cents to \$1 if bought at retail, you will realize the exceptional value you are getting.

Extra Blades

You can at any time get extra blades for the Buffalo Safety Razor from us at 40 cents for a package of five. This also entitles you to Merchandise-Bonus.
